

Engineered SPC Floor

Applying the industry leading stone polymer stabilized base, the innovative Engineered SPC Floor provides all the benefits of timber flooring including the perceived warmth and cosiness while not damaging any trees.

The environmentally friendly flooring solution uses high quality décor film on top of the SPC core, or rigid core, to imitate the same feeling from authentic wooden floors.

Our SPC flooring encompasses 8 colour options to offer the warmth as often described with timber floors. Lighter and natural colours are exceptional in expanding the spaciousness of interior while darker colours can provide additional characteristic to the design of the house.

100% WATER PROOF

FAST & SECURE CLIP SYSTEM

PET PROOF

INSTALLATION ON ANY SURFACE

SOUND REDUCING PAD

SUPERIOR SCRATCH RESISTANCE

WILL NOT EXPAND OR CONTRACT

NO ACCLIMATIZATION NECESSARY

Benefits of SPC floors

The unorthodox SPC flooring solution comes with benefits that traditional wooden floor cannot compete. The rigid core technology is 100% waterproof while being able to withstand dropped objects. SPC is also temperature- and climate-proof as it will not expand or contract in extreme temperatures and do not require acclimatization.

The overlaid dual protection layers offer unprecedented scratch resistance that is even pet-proof. Extending the protection of our ecosystem and customers, our engineered SPC floor is formaldehyde free.

Environmentally friendly “timber” floor

Based on the SPC rigid core layer, the décor film sits on a stable, waterproof and highly durable base while showcasing the texture and colour expected from authentic timber floors. The naturalness from the décor film is protected from wear and tear and discolouration with a ceramic matt UV coating and a durable wear layer.

Pre-installed acoustic cork below the SPC layer acts as both sound dampening and flexible layer for installing on upper levels and minor rough surfaces. Our fast and secure clip locking system with drop lock on the ends simplifies the installation process. Our innovative solution offers all the benefits of and above actual timber floors while being more affordable as well.

Our quality assurance

All our SPC rigid core flooring comes with lifetime residential warranty and 10-year commercial warranty with our quality also assured by the Australasian Timber Flooring Association. Our innovative SPC flooring can be used in a range of scenarios. Learn how can our rigid core solution benefit your next build by contacting us or visiting our Melbourne office.
